A

Abdominal pressure
in the critically ill 1453
Acidosis
anion gap after HES administration 1287
continuous hemofiltration 1244
Acute Physiology and Chronic Health Evaluation (APACHE) (see *Scores*)
Acute lung injury (ALI)
endothelial-specific proteins 1259
epidemiological data challenge 884e
inhaled nitric oxide 881e
inhaled nitric oxide – European multicentre study 911
pertussis 1346c
physiology and P-V curve 1040e
prevalence, etiology, outcome 920
prone position 1222
severity, outcome and, current definition 930
volume-dependent compliance 1084
Acute phase proteins
after cardiac arrest 1386
Acute respiratory distress syndrome (ARDS)
abdominal computed tomography 330c
after pneumonectomy 1173
alveolar recruitment 1297
antioxidant status 134e, 180
APRV/BIPAP 1203e
beta thalassemia and yersiniosis 226
bronchodilators 230
consensus on ventilator–associated lung injury 1444
corticosteroids 1191
epidemiological data challenge 884e
epidemiology and outcome 538
ethylene glycol intoxication 1200c
fluvoxamine overdose 548c
following bilateral femoral nailing 547c
functional residual capacity 540
hemodynamic profile 246c
hypersensitivity pneumonitis 755
improved outcome 887e
improved prognosis 936
inhaled nitric oxide 881e
inhaled nitric oxide – modulator of lung injury 1024
inhaled nitric oxide in combination with iv prostacyclin 752, 1474c, reply 1475c
intrahepatic porto-systemic shunt 1333c
malaria 744
necessity of transesophageal echocardiography 637c
partial liquid ventilation 420
post-traumatic stress disorder 697
prevalence, etiology, outcome 920
prone position and nitric oxide 29
radiocontrast-mediated 546c
right-to-left interatrial shunt, prone position 412
secondary to thermal injury 1231
severity, outcome, and current definition 930
surfactant 330c
volume-dependent compliance 1084
Yersinia enterocolitica sepsis 226, 1340c, reply 1341c
Acute respiratory failure (ARF)
cardiogenic pulmonary edema 21
noninvasive ventilation 662
partial liquid ventilation combined with kinetic therapy 496
prognosis and cost-utility analysis in COPD 452
Adhesion molecules
human albumin 1357e, 1381
Alcohol
agitation 852
detection in saliva 492
Alkalosis
anionic bases in renal replacement therapy 1209e
treatment with omeprazole 1201c
Allergy
hydroxyethyl starch 220
Alveolar recruitment
sustained inflation in ARDS 1297
Analgesics
in Danish ICUs 186
Antioxidant status
ARDS 134e, 180
N-acetyl cysteine 432e
Aspiration
nasojejunal tube feeding 574
scintigraphic evaluation 311
ventilator-associated pneumonia 553e
Asthma
anaphylactoid reaction to hydroxyethyl starch 220
hypercapnia 425c, reply 425c
Atrial tachyarrhythmia
after cardiac surgery 242c, reply 243c
pulsus paradoxus indicating heart failure 333c
role of magnesium infusion 243c, reply 243c
Auditory evoked potentials
electrophysiological monitoring in ICU 350e
sedation scores 377
Automatic tube compensation
work of breathing imposed by tracheostomy tubes 514
Autopsy
quality assurance in ICU 360
tool to monitor diagnostic error 343e

B

Bicarbonate
continuous hemofiltration 1211e, 1244
hypercapnia 425c, reply 425c
Bilevel positive airway pressure (BIPAP)
and APRV 1203e
in pediatric practice 1194
non-invasive 458
patient-ventilator synchrony 645e
Book review 329, 1197, 1330, 1467, 1467
Botulism
cranial nerve palsies and descending paralysis 765c
Bronchodilators
airway obstruction due to tracheomalacia 729
COPD 1206e
influence of tidal volume 1215
in the ICU 230
Bronchopleural fistula
selective bronchial blockade using a Fogarty catheter 535
Brain death
energy expenditure 970
transcranial Doppler ultrasonography 822

C

C1-esterase inhibitor
graft failure after lung transplantation 1315
hereditary angioedema and inhald adrenaline 1337c
Cardiac output
bronchial thermodilution 211
continuous monitoring 131e
continuous thermodilution 166
Capgras delusion
following critical illness 1183
Capillary leak
Clark's syndrome 334c
indocyanine and glucose dilution method 304
Cardiac arrest
acute phase response 1386
soluble L- and P-selectins 588
Cardiac troponin I
fluid therapy 625
sepsis 1165
Cardiogenic shock (see *heart failure*)
Cardiopulmonary bypass
metabolic acidosis
Cardiopulmonary resuscitation
active compession-decompression
liver rupture 1032c
soluble L- and P-selectins 588
Cefpirome
in posttraumatic SIRS 486

nasojejunal tube feeding 574

O

Omeprazole
metabolic alkalosis 1201c
Outcome
after intermittent high-volume hemofiltration 814
ARDS 538, 881e, 920, 930
head injury in children 722
health system research 1353e
hemorrhagic shock and encephalopathy syndrome 293
organizational changes in ICU 1367
SOFA score 686
weaning from mechanical ventilation 581
Oxygen consumption
central venous pressure and cardiac output 126c, reply 126c
Oxygen delivery
central venous pressure and cardiac output 126c, reply 126c
Oxygen electrodes
assessment of regional tissue oxygenation 1044r

P

Palladium-porphyrin-phosphorescence
assessment of regional tissue oxygenation 1044r
Panarteritis
drug abuse 113
Pancreatitis
evidence-based magement 146
Partial liquid ventilation
combinde with kinetic therapy 496
review 420
Pediatric and neonatal intensive care
Brain asphyxia
induced hypothermia 1111
Bronchodilators
severe tracheomalacia 729
Bronchopulmonary dysplasia
prediction 241c, reply 241c
Chronic lung disease
early postnatal dexamethasone in high risk preterm infants 712
Dead space
measurement in newborns 705
Functional residual capacity
measurement 1118
Head injury
somatosensory evoked potentials 722
Hemorrhagic shock and encephalopathy syndrome
neurological course and predictors of outcome 293
High frequency oscillatory ventilation
efficacy and safety 1459
new insights 1194
vs. conventional mechanical ventilation 68, 1459
Intensive Care
admission patterns and outcome in South African paediatric ICU 88
Laryngeal mask
laryngotracheo-oesophageal clefts 714
Laryngotracheo-oesophageal clefts
laryngeal mask 714
Mechanical ventilation
dead space measurement 705
high frequency oscillatory ventilation 68
new insights 1194
Neonates
early postnatal dexamethasone in high risk preterm infants 712
laryngotracheo-oesophageal clefts and laryngeal mask 714
respiratory distress syndrome 68
severe tracheomalacia 729
Nitric oxide
improvement of response after dypridamole 300
pulmonary vasospasm or vascular obstruction 1126
respiratory mechanics in RSV bronchiolitis 81
rebound pulmonary hypertension 76
Pulmonary hypertension
differentiation with inhaled NO 1126
rebound during weaning off nitric oxide 76
Respiratory distress syndrome
conventional mechanical ventilation vs. high frequency oscillatory ventilation 68
Surfactant
respiratory distress syndrome 68
Pericardial effusion
in association with gastroschisis 422c
Pericarditis
cardiac tamponade in Kawasaki disease 1137
fibrinolysis 338c
Permissive hypercapnia
in infants 1194
intracranial pressure 125c, reply 125c
outcome in ARDS 887e
Pharmacokinetics
cefpirome during hemofiltration 1427
cefpirome in posttraumatic SIRS 486
morphine and lidocaine in critcally patients 110
vancomycin clearance during hemofiltration 1100
Pheochromocytoma
isolated quadriparesis 123c
Phosphodiesterase inhibitors
in SIRS/sepsis and congestive heart failure 620
Plasma volume
indocyanine green 1252
measurement 1212e
Platelets
central venous catheterisation 481
fat emulsions 395
Pneumonia
bronchopleural fistula 535
community-acquired pneumococcal 143e, 198
diaphragm paralysis due to neurofibromatosis 1338c
Legionella pneumophila – imipenem 1030
neutrophil exocytosis 44
prophylaxis of upper gastrointestinal bleeding 118
toxic shock syndrome 335c
ventilator-associated
avoidance of tracheal intubation 553e
endotracheal tube biofilm 1072
Pneumothorax
after removal of a feeding tube 331c
ultrasound diagnosis 383
Polymorphonuclear neutrophils (PMN)
ARDS 134e
pneumonia 44
respiratory burst after liver transplantation 612
Positive end-expiratory pressure (PEEP)
consensus on ventilator–associated lung injury 1444
effect on intracranial pressure 125c, reply 125c
intrinsic
bronchodilators in COPD 1206e, 1215
dynamic, static 274, 768c, reply 769c
proportional assist vs. pressure support ventilation in COPD 790
relevance of measurement 252e
protection against lung collapse in pigs 1140
stenting effect in severe tracheomalacia 729
therapy for failing hearts 778e
variability of arterial oxygenation 37
Postpartum
cerebral vasospasm 532
heart failure 223
nicardipine 1277

Post-traumatic stress disorder
after intensive care treatmetn for ARDS 697
Pre-eclampsia
nicardipine 1277
Pressure support ventilation
cardiogenic pulmonary edema 1e, 21
different modalities of mechanical ventilation 775e
noninvasive in non-COPD-patients 1374
versus proportional assist ventilation in COPD 790
work of breathing imposed by tracheostomy tubes 514
Procalcitonin
after trauma in a thyroidectomized patient 1031c
clearance during hemofiltration 1198c
Prognosis
abdominal CT and ARDS 330c
community-acquired pneumococcal pneumonia 198
electroencephalography in head injury 872
endotoxin-core antibodies in sepsis 435
mechanical ventilation and COPD 452
multpile myeloma in ICU 1395
SAPS II 192
somatosensory evoked potentials in head injury in children 722
Prone position
alveolar recruitment in ALI 1222
ARDS and NO 29
prevention of ventilator–associated lung injury 1444
spotaneous breathing after near-drowning 1469c
Proportional assist ventilation
current topic 1021
different modalities of mechanical ventilation 775e
versus pressure support ventilation in COPD 790
Prostacyclin
hypoxic pulmonary hypertension 1147
in combination with inhaled nitric oxide 752, 1474c, reply 1475c
Prothrombin complex
emergency correction of coagulation 1131
influence on plasma coagulation in critically ill patients 1105
Pulmonary artery catheter
continuous cardiac output monitoring 131e, 166
Pulmonary blood volume
vascular reactivity of the lung 1413
Pulmonary edema
cardiogenic
noninvasive pressure support ventilation 15, 21
noninvasive ventilation 1e, 21
malaria 744
Pulmonary hypertension
inhaled nitric oxide in combination with aerosolized prostacyclin 1147
inhaled nitric oxide in combination with iv prostacyclin 752, 1474c, reply 1475c
pertussis 1346c
pulmonary vascular reactivity 1413
venous air embolism and inhaled NO 983
Pyelonephritis
gas-forming *E. coli* 628

Q

Quality assurance
application of mortality prediction systems 977
autopsy 343e, 360
medication errors 341e, 353, 1478c
scoring systems in ICU 418

R

Ranitidine
upper gastrointestinal bleeding during mechanical ventilation 118
Regional tissue oxygenation
assessment 1044
Renal failure
after acyclovir treatment 639c
in critically ill 1188
intermittent high-volume hemofiltration 814
intracerebral hemorrhage in critically ill patients 63
liver disease 5r
myoglobin clearance and removal during hemofiltration 1169
renal replacement therapy in ICU 781e
early vs.late renal replacement after trauma 805
rhabdomyolysis 469
vancomycin assay 1291
Respiratory burst
increased by GM-CSF after liver transplantation 612
Respiratory mechanics
effects of open heart surgery 1092
FRC measurement in mechanically ventilated infants 1118
lung collapse in pigs 1140
nitric oxide 81
prone position in ARDS 1222
Rhabdomyolysis
bacterial sepsis-induced 469

S

Salbutamol
in mechanically ventilated COPD patients 1206e, 1215
vs. nitric oxide in RSV bronchiolitis 81
Scores
APACHE II in pancreatitis 146
customization of a severity model 140e
Glasgow Outcome Scale in children 722
measurement of performance of ICUs 418
Mortality Probability model (MPM) II 977
nine equivalents of nursing manpower use score (NEMS) 606
Omega system 245c, reply 246c
SAPS II – prognostic performance and customization 192, 878c, reply 879c
sedation 377
SOFA score in trauma 389
SOFA: prospective, multicenter study 686
TISS-28 606
TISS and post-ICU mortality 1035e, 1061
Scintigraphy
evaluation of aspiration 311
Sedation
auditory evoked potentials 377
clorazepam for alcohol withdrawal syndrome 1435
electrophysiological monitoring 350e
in Danish ICUs 186
in intensive care 137e, 634
Selective decontamination of the digestive tract (SDD)
in critically ill patients 1323
Sepsis (see also *septic shock* and *SIRS*)
cholesterol 748
critical illness neuromuscular abnormality 641c, reply 642c
endotoxin and heat shock protein expression 52
endotoxin-core anitbodies 427e
euthyroid sick syndrome 1402
improvement of cardiovascular function with hemofialtration 733
immune response 1027
immunglobulins 427e
immunmodulatory therapies in sepsis 556e
intermittent high-volume hemofiltration 814
mortality and endotoxin-core antibodies 435
milrinone for cardiac output increase 620
phosphodiesterase inhibitors 620
prevention and treatment 869
rhabdomyolysis 469
T helper cell subset ratios 106
toxic epidermal necrolysis 1307
troponin and myocardial injury 1165
Yersinia enterocolitica in patient with thalassemia major 226, 1340c, reply 1341c
Septic shock (see also *sepsis* and *SIRS*)
effects of dobutamine and dopexamine 942
liver transplantation for Caroli's disease 1017
Mycobacterium tuberculosis 238c
vasopressin 763
without documented infection 2167

Sinusitis
in ICU patients 1066
nosocomial 1037e
Subarachnoid hemorrhage
barbiturate coma 406
Guillain-Barré-syndrome 1432
management of cerebral vasospasm 1463
pressure autoregulation 1282
Sucralfate
upper gastrointestinal bleeding in mechanically ventilated patients 118
Surfactant
lung transplantation 862
Systemic inflammatory response syndrome (SIRS)
abdominal aortic aneurysm repair 279
after major surgery 255e
pharmacokinetics of cepfpirome 486
whole body hyperthermia 1013

T
Thalassemia major
Yersinia enterocolitica sepsis 226, 1340c, reply 1341c
Thermal injury
ARDS 1231
Thermodilution
bronchial 211
continuous 166
indocyanine green 1212e
pulmonary artery vs. arterial 843
Thoracentesis
ultrasound-aided 896e, 955, 1029c
Thrombocytopenia
intracerebral hemorrhage in critically ill patients 63
Thrombolysis
liver rupture after CPR 1032
Tonometry
alveolar ventilation changes and gastric intramucosal pH 269
influencing factors 249e
Toxic epidermal necrolysis
plasma exchange 1307
Toxic shock syndrome
following influenza A infection 335c
Tracheostomy
clinical impact of new procedures 326
percutaneous dilatational
after translaryngeal tracheostomy 639c
bronchoscopy 3e
pneumoperitoneum 1335
tracheal lesions 102
Transesophageal echocardiography
ARDS 637c
endocarditis and ventricular septal defect 236c
monitoring of volume status 1212e
postpartum myocardial failure 223
superior vena cava thrombosis 1331c
Transjugular intrahepatic portosystemic shunt (TIPS)
improvement of renal function in hepatorenal syndrome 5r
Transplantation
bone marow
Chaetonium globosum infection
liver
impact on renal failure 5r
respiratory burst 612
septic shock 1017
tirilazad mesylate as antioxidant 616
lung
C1-esterase inhibitor in graft failure 1315
surfactant replacement 862
Trauma
early enteral nutrition 157
flail chest and refractory lung atelectasis 410
in combination with methamphetamine intoxication 758
procalcitonin 1031c
renal replacement therapy 805
rupture of vertebral artery 1177
SOFA score 389
Troponin
myocardial injury in sepsis 1165
Tumor necrosis factor (TNFα)
abdominal aortic aneurysm repair 279
after major surgery 255e
cardiac arrest and CPR 588
immunmodulatory therapies in sepsis 556e

U
Ultrasound
Doppler for brain death diagnosis 822
diagnosis of pneumothorax 383
thoracentesis 896e, 955, 1029c

V
Vancomycin
clearance during hemofiltration 1291
measurement in acute renal failure 1291
Vasospasm
cerebral
subarachnoid hemorrhage
coronary
ventricular arrhythmia 1471c
Vasopressin
septic shock 763
Ventilator–associated lung injury
consensus conference 1444
pathomechanism 1040e
small tidal volumes 771e
Ventilators
exhalation valve and respiratory mechanics 799

W
Weaning
noninvasive pressure ventilation 1355e
noninvasive pressure ventilation in non-COPD patients 1374
model for extubation 1077
screening parameters 581
Work of breathing
bronchodilators in COPD 1206e
comparison of different ventilators 239c, reply 240c
different modalities of mechanical ventilation 775e
inspiratory flow waveform 503
intrinsic PEEP 252e
proportional assist ventilation 1021
proportional assist vs. pressure support ventilation in COPD 790
tracheostomy tubes 514
